Demonstration Overview

The demonstration video presents the complete implementation of the **Import Sets and Transform Maps** project in ServiceNow. It covers all nine phases, from preparing the employee data to creating reports and the dashboard.

Phases Demonstrated

- 1. Phase 1 – Prepare the Spreadsheet**
Preparing the Excel spreadsheet with employee information such as Employee ID, Employee Name, Email, Department, and Location.
- 2. Phase 2 – Create the Custom Table**
Creating the **Employee Test** table with the required employee fields.
- 3. Phase 3 – Create the Import Set**
Loading the Excel spreadsheet into ServiceNow and creating the **Employee Import** staging table.
- 4. Phase 4 – Create the Transform Map**
Creating the Transform Map and mapping the imported fields to the Employee Test table.
- 5. Phase 5 – Validate the Imported Data**
Checking the transformed employee records in the Employee Test table.
- 6. Phase 6 – Configure Coalesce**
Using **Employee ID** as the Coalesce field to prevent duplicate records and update existing records.
- 7. Phase 7 – Perform Repeated Imports**
Importing the employee data again and verifying the inserted, updated, and ignored records.
- 8. Phase 8 – Create Reports**
Creating reports for Employees by Department, Employees by Location, and Employee List.

9. **Phase 9 – Create the Dashboard**

Creating the **Employee Analytics Dashboard** and adding the generated reports to display employee information.
