

Module 3: Ideation Phase

Empathize & Discover

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviors and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map Diagram

Pain

Gain

- Frequent record duplicates and missing fields from manual import.
- Unmapped target fields and unhandled exceptions halting import jobs.
- Lack of real-time visibility for HR leadership and service desk managers.

- Seamless automated Excel data ingestion via ServiceNow Transform Maps.
- Real-time interactive dashboards for employee demographics and status.
- Drastically reduced manual data entry workload and zero duplicate records.
