

Ideation Phase

Define the Problem Statements

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Framework Guidance & Field Definitions:

I am...	Describe the customer and their attributes here.
I'm trying to...	List the thing they are trying to achieve here.
But...	Describe the barrier or blockage that gets in the way here.
Because...	Describe the cause of the problem/issue/blockage here.
Which makes me feel...	Describe the emotion the customer feels when facing the problem.

Customer Problem Statement Breakdown

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS1	HR Administrator / Data Operations Specialist	Import and update employee records seamlessly from external Excel files into ServiceNow target tables	Manual data entry and row-by-row mapping lead to frequent record duplicates, errors, and missing fields	There is no automated staging table or Transform Map pipeline currently configured	Frustrated and overwhelmed by repetitive manual tasks and worried about data inaccuracy
PS2	IT Service Desk Manager & HR Auditor	Gain real-time visibility into employee demographics, departments, and	Employee data is scattered across disconnected static files without centralized real-	ServiceNow reporting tools and interactive dashboards are not configured or	Inefficient and unable to make fast, accurate, data-driven management

		active statuses for organizational reporting	time visualization	integrated with target tables	decisions
PS3	System Integrator / ServiceNow Developer	Ensure secure, compliant, and error-free execution of automated import sets and scheduled data loads	Data validation failures and unmapped target fields halt import jobs without clear error logs	Field transform scripts, coercion rules, and exception handling logic are incomplete or missing	Anxious about potential system failures, security risks, and prolonged troubleshooting cycles
